Table S3: S3 Analysis
- Locations: 0=Fovea, 1=Perifovea, 2=Near-periphery
- S3 commonly appears trimodal (=having 3 peaks at ~580, 620, and 650, at both excitation wavelengths.
- Highlighted in red are the absolute peaks on each dataset.
- The number of absolute peaks in each signal category is summarized below.
- Additionally, for S3-436 only, existence of an additional small peak ("hump") at ~475 nm is noted.
