Supplementary Figure 1: Scatter plots of CsA drug distribution in the cornea and RPE/Choroid of the data found Table 2. Dutch-Belted rabbits were treated with 50 μl of Restasis®, 0.05% CsA-MiDROPS™, or 0.1% CsA-MiDROPS™ for nine days. Three animals (six eyes) per group were harvested for determination of CsA concentration by LC-MS/MS. Units are ng/g.
